REPORT ON THE EIGHTH CENSUS
OF CANADA, 1941

To His Excellency Field Marshal the Right Honourable Viscount Alexander of Tunis, K.G., G.C.B., G.C.M.G., C.S.I., D.S.O., M.C., LL.D., A.D.C., Governor General and Commander-in-Chief of the Dominion of Canada.

MAY IT PLEASE YOUR EXCELLENCY:

I have the honour to lay before your Excellency the eighth volume of the Report of the Eighth Census of Canada taken as of date June 2, 1941. This volume deals with agriculture. It contains data relating to occupied and abandoned farms, such as area, value, tenure, size of holding, production and value of various crops, number and value of live stock, certain farm expenditures, indebtedness, etc. Tables showing a number of cross-classifications by size, tenure and type of farm are also included.

I have the honour to be,
Your Excellency's most
obedient servant,

JAMES A. MacKINNON,
Minister of Trade and Commerce.

OTTAWA, February 18, 1947.

RAPPORT SUR LE HUITIÈME RE-
CENSEMENT DU CANADA, 1941

A Son Excellence le feld-maréchal le très honorable vicomte Alexander de Tunis, K.G., G.C.B., G.C.M.G., C.S.I., D.S.O., C.M., LL.D., A.D.C., Gouverneur Général et Commandant en chef du Dominion du Canada.

QU'IL PLAISE À VOTRE EXCELLENCE:

J'ai l'honneur de déposer devant votre Excellence le huitième volume du Rapport du Huitième Recensement du Canada effectué le 2 juin 1941. Ce volume traite de l'agriculture. Il contient des données sur les fermes occupées et abandonnées telles que la superficie, la valeur, le mode de possession, l'étendue des fermes, le rendement et la valeur des différentes cultures, le nombre et la valeur des bestiaux, certaines dépenses et dettes des fermes, etc. Des tableaux contenant un certain nombre de classifications recoupées selon l'étendue, le mode de possession et le genre de ferme sont également présentés.

J'ai l'honneur d'être,
de Votre Excellence, le
très obéissant serviteur,

JAMES A. MacKINNON,
Ministre du Commerce.

OTTAWA, 18 février 1947.

PREFACE

Volume VIII of the Eighth Census of Canada presents the final results of the Census of Agriculture taken as of June 2, 1941.

A brief introduction sets out various definitions and explanations for the items or terms used in the volume. A number of tables present statistics for previous censuses, where available, in order to show the changes that have taken place over a period of years. Detailed statistics are also presented for the various counties or census divisions, and in a number of tables for census subdivisions. In appendices will be found copies of the questionnaires used in the enumeration, as well as a Tabular Index. Detailed descriptions of the census divisions used for the presentation of the results are also included in the appendix.

Complete bulletins have been published for each province and contain the historical comparisons as well as the general tables.

The organization for the taking of the census and the general planning of the census was carried on under the direction of A. J. Pelletier, F.S.S., Chief of the Census Branch. Since May, 1942, Mr. Pelletier was seconded to the Government of Jamaica, and the materials for this volume were prepared under the direction of O. A. Lemieux, M.S.A., Ph.D., Director of the Census Division, assisted by J. L. Forsyth, M.Sc., Statistician in charge of the Agricultural Section of the Census Division.

HERBERT MARSHALL,
Dominion Statistician.

February 18, 1947.

PRÉFACE

Le volume VIII du Huitième Recensement du Canada présente les résultats définitifs du recensement de l'agriculture tel qu'effectué le 2 juin 1941.

Dans une brève introduction sont données les définitions et explications des divers détails ou des termes employés dans le volume. Un certain nombre de tableaux offrent des statistiques des recensements antérieurs, lorsqu'elles sont disponibles, afin d'indiquer les changements qui se sont produits au cours d'un certain nombre d'années. Des statistiques détaillées sont également présentées pour les divers comtés ou divisions de recensement, et, dans un certain nombre de tableaux, pour les subdivisions de recensement. Dans les appendices paraissent des reproductions des questionnaires qui ont servi dans l'énumération ainsi qu'un index tabulaire. Les descriptions complètes des divisions de recensement telles qu'utilisées pour la présentation des résultats sont également comprises dans l'appendice.

Des bulletins complets contenant des comparaisons historiques et les tableaux généraux ont été publiés pour chaque province séparément.

L'organisation du recensement et le plan général de son opération étaient sous la direction d'A.-J. Pelletier, F.S.S., chef de la Branche du Recensement. Depuis mai 1942, M. Pelletier ayant été prêté au gouvernement de la Jamaïque, la matière de ce volume a été préparée sous la direction d'O.-A. Lemieux, M.S.A., Ph.D., directeur de la Division du Recensement, assisté de J. L. Forsyth, M.Sc., statisticien en charge de la Section de l'Agriculture de la Division du Recensement.

HERBERT MARSHALL,
Statisticien du Dominion.

18 février 1947.

INTRODUCTION

This part of the volume presents statistics of agriculture for the provinces of Ontario, Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory, as compiled from data obtained in the Census of June 2, 1941.

A number of preliminary bulletins have been published heretofore giving certain census data as it became available. This volume presents final figures from the census and therefore includes all revisions made since the preliminary reports were issued. The volume is made up of four parts: (a) comparative tables, (b) detailed tables by province, census division or county, (c) detailed tables by census subdivision and (d) cross-classifications.

In Tables 1 to 27 inclusive, statistics for previous censuses are given, where available, in order to show the changes which have taken place in the province over a period of years.

In Tables 28 to 50 inclusive, certain statistics are given for each census division or county. These include data pertaining to the farm population, the number of farm workers, the tenure, size and type of farms, farm values and areas, condition of occupied farm lands, farm indebtedness, production and value of the various farm products, gross farm revenues and expenses, live stock on farms and farm machinery. Certain data pertaining to abandoned or idle farms, are also included in this series of tables.

Tables 51 to 54 inclusive contain, by census subdivision, statistics of the farm population, tenure, farm labour, area and condition of occupied farm lands, farm values, size of farms, number of non-resident farms, area of certain field crops and the number of the different classes of live stock.

Tables 55 to 129 inclusive, contain a number of cross-classifications of data for the province as a whole. These tables give a fairly complete study of the farm operators and population, farm areas, values and indebtedness, farm expenses and gross revenues, condition of occupied farm land, and the number of farms reporting certain crops and classes of live stock, classified by size, by tenure and by type of farm.

Date of the Census.—The Census of 1941 was taken as of June 2nd, while the censuses of 1931, 1921 and 1911 were taken on June 1st. The Census of 1901 was taken on April 1st, that of 1891 as of April 5th, the Census of 1881 on April 4th and that of 1871 on April 2nd. These dates should be kept in mind when comparing the number of live stock on farms, since a census taken in June would include a large number of young animals not included in a census taken in April.

Year to which Census Figures apply.—The inquiries relating to the farm operators, farm population, farm areas and tenure, farm values, farm machinery, mortgages and liens, number of fruit trees and live stock on farms, were as of June 2, 1941. Data relating to the number of trees tapped and the production of maple products were for the 1941 season. The inquiries relating to farm workers elicited information concerning those employed during the week ending May 31, 1941. Statistics relating to the production of crops, animal and forest products, purchases and disposals of live stock, farm expenses and revenues, were obtained for the year 1940.

INTRODUCTION

Cette partie du volume présente les statistiques agricoles pour les provinces d'Ontario, du Manitoba, de la Saskatchewan, de l'Alberta, de la Colombie Britannique et le Territoire du Yukon, telles que compilées d'après les données obtenues lors du recensement du 2 juin 1941.

Quelques bulletins préliminaires ont été publiés jusqu'ici contenant certaines données de recensement à mesure qu'elles étaient disponibles. Ce volume présente les chiffres définitifs du recensement; il comprend donc toutes les révisions faites depuis la publication des rapports préliminaires. Le volume est divisé en quatre parties, à savoir: (a) tableaux comparatifs, (b) tableaux détaillés par province, division ou comté de recensement, (c) tableaux détaillés par subdivision de recensement, et (d) classifications recoupées.

Les tableaux 1 à 27 inclusivement donnent les statistiques des recensements antérieurs, lorsqu'elles sont disponibles, de manière à montrer les changements survenus dans la province pendant un certain nombre d'années.

Les tableaux 28 à 50 inclusivement donnent certaines statistiques pour chaque division ou comté de recensement. Ils consistent en données sur la population agricole, le nombre de travailleurs agricoles, la tenure, la grandeur et le type de ferme, les valeurs et les superficies, l'état de la terre des fermes occupées, les dettes de la ferme, la production et la valeur des divers produits agricoles, les revenus bruts et les dépenses, les bestiaux sur les fermes et machines agricoles. Cette série de tableaux renferme également certaines données sur les fermes abandonnées ou inexploitées.

Les tableaux 51 à 54 inclusivement contiennent, par subdivision de recensement, les statistiques de la population agricole, la tenure, la main-d'œuvre agricole, la superficie et l'état de la terre, les valeurs et la grandeur des fermes, le nombre de fermes inhabitées, la superficie de certaines grandes cultures et le nombre de bestiaux de diverses classes.

Les tableaux 55 à 129 inclusivement contiennent quelques classifications recoupées de données pour la province dans son ensemble. Ces tableaux présentent une étude assez complète des exploitants et de la population agricoles, des superficies des fermes, des valeurs et des dettes, des revenus bruts et dépenses de la ferme, de l'état de la terre des fermes occupées, et du nombre de fermes déclarant certaines cultures et classes de bestiaux, classifiées par grandeur, tenure et type de ferme.

Date du recensement.—Le recensement de 1941 a été commencé le 2 juin, tandis que ceux de 1931, 1921 et 1911 l'avaient été le 1er juin. Le recensement de 1901 a été effectué le 1er avril, celui de 1891 le 5 avril, celui de 1881 le 4 avril et celui de 1871 le 2 avril. Ces dates devraient entrer en ligne de compte dans la comparaison du nombre de bestiaux sur les fermes, puisque un recensement effectué en juin comprendrait un plus grand nombre de jeunes animaux non compris dans un recensement effectué en avril.

Année à laquelle s'appliquent les chiffres du recensement.—Les questions concernant les exploitants de fermes, la population agricole, la superficie et la tenure, les valeurs de la ferme, les machines agricoles, les hypothèques et les droits de rétention, le nombre d'arbres fruitiers et de bestiaux sur les fermes, ont été faites en date du 2 juin 1941. Les données relatives au nombre d'arbres entaillés et à la production de produits de l'érable se rapportent à la saison de 1941. Les questions relatives aux travailleurs agricoles ont mis à jour des renseignements concernant les travailleurs employés pendant la semaine terminée le 31 mai 1941. Les statistiques se rapportant à la production des récoltes, aux produits animaux et forestiers, aux achats et aux ventes de bestiaux, aux dépenses et aux revenus de la ferme, ont été obtenues pour l'année 1940.

Method of Taking the Census.—For the purpose of taking the census, the provinces were divided into census districts corresponding as nearly as possible to federal electoral districts. The census districts were subdivided into census subdistricts or enumeration areas. For the 1941 Census, the country was divided into 16,352 enumeration areas, 10,734 of which contained farms. An enumerator was appointed for each enumeration area, and it was his or her duty to visit every farm in this area to secure the information asked for on the schedules. The information was secured from the farm operator or, in his absence, from a competent member of the family. After being checked by the census commissioner, the schedules were forwarded to the Dominion Bureau of Statistics at Ottawa, where they were edited by a trained staff.

Schedules.—Four schedules were employed in the taking of the 1941 Census of Agriculture, namely: (1) a general farm schedule (Form 2), (2) a schedule for fruit and vegetable farms (Form 2A), (3) a schedule for abandoned or idle farms (Form 2B), and (4) a schedule for statistics of animals and agricultural production elsewhere than on farms (Form 3).

The general farm schedule, containing 643 questions, elicited information concerning, (a) the farm operator, population, areas, tenure, condition of occupied lands, values, indebtedness, farm machinery, and live stock on farms as of June 2, 1941, (b) the area of field crops sown or planted for harvest in 1941, the number of persons employed on the farm during the week ending May 31, 1941, and (c) the area, production and value of crops, the area and cause of crop failure, weeks of hired labour, farm expenditures, animal products of the farm, forest products cut on the farm, the quantity and value of crops and other farm products sold or consumed on the farm, etc., for the year 1940.

A special schedule of 312 questions elicited statistics concerning fruit and vegetable farms (see page xx for definition). The inquiries on this schedule relate to, (a) the area, production and value of vegetables and small fruits, the production and value of orchard and vineyard fruits, the amount received from the sale of nursery products and vegetable plants, and the value of fruits and vegetables consumed on the farm, for the year 1940, and (b) the area and value of greenhouse and hot-house establishments, the number of fruit trees or grape vines on farms according to various age groups and the area of farm land used for growing vegetables, fruits, nursery products and flowers in 1941.

The abandoned or idle farm schedule elicited information such as the total area, the area of improved land, and the value of land and buildings on the abandoned or idle farms.

The schedule for agriculture elsewhere than on farms elicited statistics of animals, animal products, fruits, garden and greenhouse products, etc., on plots of less than one acre, and on larger plots which did not fully conform to the census definition of a farm. These plots may be located in either urban or rural areas, and are mainly records of home gardens and animals.

Copies of these schedules will be found in Appendix A.

Méthode d'effectuer le recensement.—Pour les fins du recensement, les provinces ont été divisées en districts de recensement correspondant autant que possible aux circonscriptions électorales fédérales. Ces districts sont subdivisés en sous-districts de recensement ou régions de dénombrement. Pour le recensement de 1941, le pays avait été divisé en 16,352 régions de dénombrement dont 10,734 contenaient des fermes. Un énumérateur fut nommé pour chaque région de dénombrement, et celui-ci ou celle-ci avait pour tâche de visiter toutes les fermes de cette région afin d'obtenir les renseignements demandés dans les questionnaires. Ces renseignements furent obtenus de l'exploitant de la ferme, ou en son absence, d'un membre compétent de la famille. Après avoir été vérifiés par le commissaire du recensement, les questionnaires furent transmis au Bureau Fédéral de la Statistique, à Ottawa, et dépouillés par un personnel spécialisé.

Questionnaires.—Quatre questionnaires sont utilisés dans le Recensement de l'Agriculture de 1941, à savoir (1) un questionnaire agricole général (Formule 2), (2) un questionnaire pour les fermes à fruits et à légumes (Formule 2A), (3) un questionnaire pour les fermes abandonnées ou inexploitées (Formule 2B), et (4) un questionnaire pour la statistique des animaux et de la production agricole ailleurs que sur les fermes (Formule 3).

Le questionnaire agricole général, contenant 643 questions, a mis à découvert des renseignements concernant (a) l'exploitant de la ferme, la population, les superficies, la tenure, l'état des terres occupées, les valeurs, les dettes, les machines agricoles et les bestiaux sur les fermes le 2 juin 1941, (b) la superficie des grandes cultures semées ou plantées pour la récolte de 1941, le nombre de personnes employées sur la ferme pendant la semaine finissant le 31 mai 1941, et (c) la superficie, la production et la valeur des récoltes, la superficie et la cause des récoltes manquées, les semaines de main-d'œuvre louée, les dépenses de la ferme, les produits animaux de la ferme, les produits forestiers obtenus sur la ferme, la quantité et la valeur des récoltes et d'autres produits agricoles vendus ou consommés sur la ferme, etc., pour l'année 1940.

Une formule spéciale contenant 312 questions a fourni les statistiques concernant les fermes à fruits et à légumes (voir définition page xx). Les questions figurant sur cette formule concernent (a) la superficie, la production et la valeur des légumes et des petits fruits, la production et la valeur des fruits de vergers et de vignobles, le montant reçu de la vente de produits de serre et de plants de légumes, et la valeur des fruits et des légumes consommés sur la ferme, pour l'année 1940, et (b) la superficie et la valeur des établissements de serres et de forceries, le nombre d'arbres fruitiers ou de cepa de vignes sur les fermes d'après différents groupes d'âge et la superficie de la terre de ferme employée pour la culture des légumes, fruits, produits de pépinière et fleurs en 1941.

Le questionnaire sur les fermes abandonnées ou inexploitées a fourni des renseignements tels que la superficie totale, l'étendue de terre défrichée, et la valeur de la terre et des bâtiments sur les fermes abandonnées ou inexploitées.

Le questionnaire relatif à l'agriculture ailleurs que sur les fermes a mis à découvert des statistiques sur les animaux, les produits animaux, les fruits, les jardinages et les produits de serre, etc., sur des lopins de terre de moins d'une acre et sur les lopins plus grands qui ne répondent pas pleinement à la définition de la ferme pour les fins du recensement. Ces lopins de terre peuvent être situés indifféremment dans des régions urbaines ou rurales et comptent principalement des potagers et des animaux domestiques.

L'appendice A contient des copies de ces questionnaires.

EXPLANATION OF TERMS

Farm.—A farm, for census purposes, is all the land located in one municipality which is directly farmed by one person conducting agricultural operations, either by his own labour or with the assistance of members of his household or of hired employees. It may consist of a single tract of land, or of a number of separate tracts held under different tenures. In order to be reported as a farm, such land must be of one acre or more in extent and have produced in 1940, agricultural products to the value of \$50 or more, or be under crops or employed for pasture in 1941.

"Resident" and "Non-Resident" Farms.—When taking the census, it was found that in a number of instances a farm was located in two or more enumeration areas. Where this occurred, the part that was located in each enumeration area was treated as a separate farm. The part located in the enumeration area where the operator lived was called a "resident" farm. The part outside this enumeration area was called a "non-resident" farm. In the majority of cases these "non-resident" farms were parts of other farms, rather than separate farms or units, although prior to the 1941 Census they were treated as separate farms. In the 1941 Census "non-resident" and "resident" farms located in the same municipality were combined as one farm. This fact must be taken into consideration when comparing the number of farms for the different census years. Any duplication in previous censuses, however, affected only the number of farms, and not their area or other statistics.

Since the farm operator would be the most reliable source for such inquiries as farm expenditures, indebtedness, etc., these data were enumerated in the 1941 Census on the "resident" farm. Where the "non-resident" farm was not part of another farm the enumerator elicited the information from the neighbour operator. These facts must be kept in mind, when making comparisons of the above mentioned statistics for the different census divisions and subdivisions.

Fruit Farms and Market Gardens (Fruit and Vegetable Farms).—These terms, as used in the 1941 Census, apply to (a) farms which produced for sale in 1940, either vegetables (other than potatoes and turnips), vegetable plants, vegetable seed, nursery products, greenhouse products, or small fruits to the value of \$50 or more, and (b) farms where there were 50 fruit trees or more in 1941. Statistics of fruits and vegetables on these farms were enumerated on the special fruit and vegetable schedule (Form 2A), while the statistics of vegetables and fruits of farm gardens and orchards were recorded on the general farm schedule (Form 2).

In summarizing the data from Fruit Farms and Market Gardens it was found that in certain cases the operator was able to give the total value of production but was not able to give a detailed breakdown of the area, production and value by crops. Where this occurred the total value of production was included in the division and provincial summaries.

In some of the larger fruit growing areas young trees, trees of other kinds of fruits, vegetables or field crops were interplanted with the older orchard trees. Similarly in some of the specialized market garden areas, there was a considerable amount of double cropping, that is, two or even

EXPLICATION DES TERMES

Ferme.—Aux fins du recensement, une ferme comprend toute l'étendue de terre située dans une municipalité quelconque et cultivée par un fermier qui l'exploite lui-même ou avec l'aide de membres de sa famille ou de personnes engagées. Elle peut se composer d'une seule langue de terre ou d'un certain nombre de lopins distincts exploités sous divers modes de tenure. Pour être désignée comme une ferme, cette étendue de terre doit être d'une acre ou plus et avoir donné en 1940 pour une valeur de \$50 ou plus de produits agricoles ou être en culture ou en pâturage en 1941.

Fermes "habitées" et fermes "inhabitées".—Lors du recensement, il a été trouvé dans plusieurs cas qu'une ferme se trouvait dans deux régions de dénombrement ou plus. Lorsque la chose se présentait, la partie située dans chacune des régions de dénombrement était traitée comme une ferme séparée; la partie située dans la région de dénombrement où demeurait l'exploitant était appelée ferme "habitée"; la partie en dehors de cette région de dénombrement était appelée ferme "inhabitée". Dans la plupart des cas, ces fermes "inhabitées" formaient partie d'une autre ferme plutôt qu'une unité ou ferme séparée, bien qu'avant le recensement de 1941 elles aient été traitées comme fermes séparées. Dans le recensement de 1941, les fermes "inhabitées" et "habitées" situées dans la même municipalité sont combinées en une seule ferme. Ce fait doit entrer en ligne de compte en comparant le nombre de fermes pour les diverses années de recensement. Cependant, lorsqu'il y a eu double emploi dans les recensements précédents, ceci n'a affecté que le nombre de fermes et non leur superficie et les autres statistiques.

Puisque l'exploitant de la ferme serait la source de renseignements la plus sûre pour des enquêtes telles que les dépenses de la ferme, les dettes, etc., ces données sont compilées, pour le recensement de 1941, d'après les fermes "habitées". Lorsque la ferme "inhabitée" ne faisait pas partie d'une autre ferme, l'énumérateur se procurait les renseignements de l'exploitant voisin. Il faut tenir compte de ces faits dans les comparaisons des statistiques ci-dessus mentionnées pour les diverses divisions et subdivisions de recensement.

Fermes à fruits et jardins maraîchers (Fermes à fruits et à légumes).—Ces termes, tels qu'employés dans le recensement de 1941, s'appliquent (a) aux fermes qui ont produit pour la vente en 1940 des légumes (autres que les pommes de terre et les navets), des plants de légumes, des semences de légumes, des produits de pépinière, des produits de serre, ou des petits fruits pour une valeur de \$50 ou plus, et (b) aux fermes où il y avait 50 arbres fruitiers ou plus en 1941. Les statistiques des fruits et des légumes sur ces fermes ont été recueillies sur le questionnaire spécial des fruits et légumes (Formule 2A), tandis que les statistiques des fruits et légumes des jardins et des vergers de ferme ont été recueillies sur le questionnaire agricole général (Formule 2).

En résumant les données obtenues des fermes à fruits et des jardins maraîchers, il a été trouvé, dans certains cas, que l'exploitant pouvait déclarer la valeur totale de la production mais qu'il ne pouvait décomposer la superficie, la production et la valeur par récolte, en détail. Dans de tels cas, la valeur totale de la production a été incluse dans les sommaires des divisions et des provinces.

Dans quelques-unes des régions agricoles importantes, de jeunes arbres, des arbres fruitiers d'autres sortes, des légumes ou des grandes cultures étaient plantés entre les arbres fruitiers plus vieux. De même, dans quelques-unes des régions spécialisées dans le jardinage maraîcher, il y avait

more crops were grown on the same area during the year. Where these practices were followed the sum of the areas reported for the individual fruits, vegetables or field crops exceeded the total area reported "under crops".

It was also noted that the average production and value of green peas per acre were, in some localities, at considerable variance with those of other areas. This may be explained by the fact that the vines as well as the pods were marketed. In such instances the grower would report a much higher production and, consequently, a lower unit value.

When the 1940 production of certain vegetables and fruits were compared with the quantity of these commodities purchased during the year by the processing plants, it was found that in some instances the production, as reported in the census, did not cover the quantities purchased by the processors. Based on an examination of the individual census returns, the following are offered as a possible explanation for these differences: (a) The inability of the grower to give the exact production of the various crops, especially as the inquiries were made from nine months to a year after the actual harvest; further, since some crops e.g., tomatoes and beans, were harvested over a period of from two to three months, the grower would have some difficulty in keeping accurate records of the production. In the case of peas for canning, the entire plant was taken by the processor and the grower did not know the actual quantity of shelled peas harvested, although he did know the value of the quantity sold to the processor. (b) Lack of an adequate conversion factor, where the units of production used in the area were not the same as those on the census schedule. An example of this is where corn for canning was sold to the processor on a ton basis, while the information was sought in dozen. (c) An apparent confusion existing in the minds of some growers as to what are field, vegetable and canning crops, and where a vegetable crop becomes a field crop or even a canning crop. It appears in some instances that such (dual or triple purpose) crops were reported as field rather than as vegetable crops. For example, a grower may plant a field of peas or beans and harvest part of it as green peas or beans, which part would be considered a vegetable crop. He may then harvest a second part for canning, and leave the remainder of the crop to ripen and report same as a field crop.

Abandoned or Idle Farms.—These terms refer to tracts of land, part or all of which had been at one time employed for the growing of crops, but which were abandoned or idle on June 2, 1941. An "abandoned farm" was one which had been unoccupied during the last several years, was in arrears for taxes, and had, to all appearances, been deserted by the owner. An "idle farm" was one which was unoccupied at the date of the census, from which no crop was harvested in 1940, and which was not under crop of any kind in 1941. These farms may have been abandoned because of financial difficulties on the part of the operator, because they were not suitable for cultivation, or for other reasons.

"Fully Owned" Farms.—Full ownership means that the operator holds the title or deed to all the land he operates.

beaucoup de récoltes intercalaires, c'est-à-dire deux récoltes ou même plus étaient cultivées sur la même étendue pendant l'année. Là où ces pratiques étaient suivies, la somme des superficies signalées pour chacune des cultures de fruits, des légumes ou pour chaque grande culture, dépassait la superficie totale déclarée comme étant "en culture".

Il a également été constaté que la production et la valeur moyennes des pois verts par acre, dans quelques localités, sont bien différentes de celles d'autres régions. Ceci s'explique par le fait que les tiges, aussi bien que les gousses, sont vendues. Dans ces circonstances, le producteur déclarait une production beaucoup plus forte et, par conséquent, une valeur moins élevée de l'unité.

Lorsque la production de 1940 de certains fruits et légumes a été comparée à la quantité de ces produits achetés pendant l'année par les établissements de conditionnement, la production, dans certains cas, telle que signalée dans le recensement, ne couvrait pas les quantités achetées par ces établissements. En se basant sur un examen des rapports individuels du recensement, ce qui suit est proposé comme explication possible de ces différences: (a) l'inaptitude du producteur à déclarer la production exacte des diverses récoltes, particulièrement lorsque les enquêtes étaient faites de neuf mois à un an après la moisson proprement dite; en outre, comme certaines récoltes, notamment celles de tomates et de haricots, étaient faites pendant une période allant de deux à trois mois, le producteur peut avoir eu des difficultés à tenir des registres exacts de la production. Dans le cas des pois destinés à la mise en conserve, le plant tout entier était pris par le conserveur et le producteur ne savait pas la quantité réelle de pois écosés qu'il avait récoltés; bien qu'il connaisse la valeur de la quantité vendue au conserveur, (b) le manque d'un facteur adéquat de conversion, là où les unités de production en usage dans la région n'étaient pas les mêmes que celles figurant sur le questionnaire de recensement. Un exemple de cette situation est que lorsque le maïs à conserve était vendu au conserveur en prenant la tonne pour base, et que le renseignement était demandé en douzaines. (c) Une confusion apparente chez certains producteurs quant à la signification de récoltes de grande culture, de légumes et à conserve, et quand une récolte de légumes devient une grande culture ou même une récolte à conserve. Il semble que, dans certains cas, ces récoltes (à deux ou à trois fins) aient été signalées comme grandes cultures plutôt que comme récoltes de légumes. Par exemple, un producteur peut planter un cliamp en pois ou en haricots et en récolter une partie comme pois ou haricots verts, laquelle partie serait considérée comme récolte de légumes; il peut alors en récolter une deuxième partie pour la mise en conserve et laisser le reste de la récolte mûrir et en faire rapport comme grande culture.

Fermes abandonnées ou inexploitées.—Ces termes s'appliquent aux étendues de terre qui ont déjà été, en partie ou en entier, utilisées pour la culture mais qui étaient abandonnées ou inexploitées le 2 juin 1941. Une "ferme abandonnée" est celle qui était inoccupée depuis quelques années, qui avait de l'arriéré d'impôt, et avait été, selon les apparences, abandonnée par le propriétaire. Une "ferme inexploitée" est celle qui était inoccupée à la date du recensement, d'où il n'a été tiré aucune récolte en 1940 et qui ne portait aucune culture en 1941. Il se peut que ces fermes aient été abandonnées à cause de difficultés financières de la part de l'exploitant, parce qu'elles n'étaient pas propres à la culture ou pour d'autres raisons.

Fermes "propriétés entières".—Propriété entière signifie que l'exploitant est détenteur du titre ou acte notarié pour toute la terre qu'il exploite.

"Partly Owned, Partly Rented" Farms.—

This term refers to instances where the farm operator owns only part of the land he operates, and rents or leases the remainder.

Farm Operator.—This term is used in the census to denote the person who is directly responsible for the agricultural operations of the farm, whether as owner, tenant, cropper or hired manager.

Racial Origin.—This was the first decennial census in which information concerning the racial origin of the farm operator was elicited on the agricultural schedule.

The term "racial origin", for census purposes, has mainly a cultural and geographical implication; it suggests whence our people came and their implied cultural background. In other words, it deals with the sources from which the Canadian population has been derived.

There has been, at times, a certain amount of confusion between "racial origin" and "nationality". The confusion arises from the fact that the term "Canadian" is not accepted to describe racial origin; the contention being that there is not, as yet, a well defined Canadian race. It should be remembered, however, that while there is no "Canadian" race, there is a well defined Canadian nationality and that while the term "Canadian" is not acceptable to describe racial origin, it is essential to describe nationality.

In tracing origin in the case of persons of European descent, the line is through the father. By applying this rule, those of mixed family origin are resolved with a fair degree of accuracy into their constituent elements.

For persons belonging to stocks involving differences in colour (i.e., the black, yellow and brown races) the entry was Negro, Japanese or Chinese, Hindu, Malayan, etc., respectively; orientals being thus segregated by country of origin.

In the case of children begotten of marriages between white and black, white and Chinese, etc., the entry under racial origin was Negro, Chinese, etc.

For the Canadian aborigines, the entry was Indian or Eskimo and for persons of white and Indian blood the entry was "Half-breed".

Farm Population.—Each farm operator was asked to state the total number of persons living on the farm as well as the number of males and females under 14 years of age and those 14 years of age and over. Members of the household on Active Service or at camp with a Reserve Army Unit were considered as part of the farm population. All persons on an institutional farm who supervised or performed agricultural operations were included in the farm population. The purpose of these inquiries was to elicit information that would permit the separation of the farm population from the rural non-farm population.

It will be noted in a few subdivisions (Table 51) that the farm population was greater than the total rural population of the subdivision. This was due to the fact that the farm population included persons living on farms that were located in cities, towns or villages, farms which, for purposes of compilation, have been included with those of the adjoining subdivision.

It often happens that the terms "farm population" and "rural population" are used synonymously. For census purposes, the rural population was that part of the population which resided outside the boundaries of incorporated cities, towns or villages, while the farm population was that part

Fermes "partiellement possédées et louées".—

Ce terme s'applique aux cas où l'exploitant d'une ferme n'est propriétaire que d'une partie seulement de la terre qu'il exploite, et loue ou prend à bail le reste.

Exploitant de ferme.—Ce terme est employé dans le recensement pour indiquer la personne directement responsable des travaux agricoles de la ferme, qu'elle soit propriétaire, locataire, métayer ou gérant agricole.

Origine raciale.—Ce recensement décennal est le premier où des renseignements relatifs à l'origine raciale de l'exploitant de ferme sont donnés sur le questionnaire agricole.

Le terme "origine raciale", pour les fins du recensement, a surtout une signification culturelle et géographique; il donne une idée de l'origine de notre peuple et le fond culturel que cela comporte. En d'autres termes, il traite des sources d'où la population canadienne est issue.

Il y a eu parfois entre les termes "origine raciale" et "nationalité" un certain degré de confusion. Cette confusion vient du fait que le terme "canadien" n'est pas accepté pour désigner l'origine raciale; il est soutenu qu'il n'y a pas encore de race canadienne bien définie. Il ne faut pas oublier, cependant, que bien qu'il n'y ait pas de race "canadienne", il existe une nationalité canadienne bien définie et que si le terme "canadien" n'est pas acceptable pour désigner l'origine raciale, il est essentiel pour désigner la nationalité.

Pour trouver l'origine, dans le cas de personnes de descendance européenne, la ligne paternelle est suivie. Par l'application de cette règle, les personnes d'origine familiale mixte sont classées avec un degré d'exactitude assez élevé, dans leurs éléments constitutifs.

Pour les personnes appartenant à des souches entraînant des différences de couleurs (i.e., les races noire, jaune et brune), l'inscription est nègre, japonais ou chinois, hindou, malais, etc., respectivement; les orientaux se trouvent ainsi classés par pays d'origine.

Dans le cas des enfants issus de mariages entre blancs et noirs, blancs et chinois, etc., l'inscription sous origine raciale est nègre, chinois, etc.

Pour les aborigènes canadiens, l'inscription est indien ou eskimo, et pour les personnes issues de blancs et d'indiens, l'inscription est "métis".

Population agricole.—Il a été demandé à chaque exploitant de ferme de déclarer le nombre de personnes vivant sur sa ferme ainsi que le nombre d'hommes et de femmes âgés de moins de 14 ans et de ceux âgés de 14 ans et plus. Les membres de la famille en service actif ou dans un camp de l'armée de réserve sont considérés comme faisant partie de la population agricole. Toutes les personnes se trouvant sur la ferme d'une institution, surveillant ou exécutant des travaux agricoles, sont incluses dans la population agricole. Le but de ces enquêtes est de mettre à jour des renseignements qui permettent de séparer la population agricole de la population rurale non agricole.

Il est à noter que dans quelques subdivisions (voir tableau 51) la population agricole est plus forte que la population rurale totale. Ceci s'explique par le fait que la population agricole comprend des personnes demeurant sur des fermes situées dans les cités, les villes ou les villages, et qui, pour les fins de la compilation, sont incluses avec les fermes des subdivisions adjacentes.

Il arrive souvent que les termes "population agricole" et "population rurale" sont employés comme synonymes. Pour les fins du recensement, la population rurale est cette partie de la population qui demeure en dehors des limites des cités, villes ou villages incorporés, tandis que la population

of the population which lived on farms, regardless of where the farms were located. A certain proportion of the rural population had no direct connection whatsoever with the farm, and, particularly in suburban areas, it more closely resembled the urban than the farm population. In Canada 59.5 per cent of the rural population was living on farms on June 2, 1941.

Farm Workers.—This term refers to the number of persons working on the farm, exclusive of housework, during the week ending May 31, 1941. It includes (a) members of the operator's family 14 years of age and over, who were working on the farm during that week, and not receiving regular wage payments, and (b) all persons working for wages and hired either by the year, month or day. The inquiries on farm labour also elicit information concerning the number of weeks of hired labour in 1940, and the amount paid this labour in cash or in kind.

Work off the Farm and Outside Income.—

The purpose of these inquiries was to obtain information concerning (a) the number of farm-operators who work off the farm in order to supplement their farm income, (b) the occupation followed by the operator in doing this work, (c) the gross returns from the work done off the farm, and (d) the gross income from other outside sources. Gross returns from work off the farm includes the returns from work done by members of the operator's family or by hired labour with or without the aid of farm facilities. Income from other outside sources includes the gross income from boarders, lodgers, overnight cabins, campers, sale of farm machinery, and the amount received as insurance for fire and hail damages, etc. Income from investments or other private sources are not included.

Farms Reporting.—This term as used throughout the volume refers to the number of farms that reported the item in question.

Area of Occupied Land.—This item includes all lands (in the municipality) on which the operator conducted farming operations of any kind, whether they were cropped, used for pasture, in woodland or idle, and regardless of whether they were owned, rented, leased or managed for others.

Improved Land.—This term is employed in the census to include all land that had been brought under cultivation and was at the date of the census, suitable for the plough. It includes land used for growing crops, as improved pasture, land occupied by buildings, laneways, barnyards, etc., and any other improved land on the farm that was idle in 1941.

Area Under Crops.—This item includes all improved lands used for the growing of field, garden, nursery and orchard crops. In instances where two or more crops were taken from the same area in one season, the area was reported only once for this inquiry. This double cropping and intercropping (see section on Fruit and Vegetable Farms, page xx) will explain why in certain subdivisions (Table 52) the total area under field crops, market gardens, fruits and nursery crops exceeds the area "Under Crops".

agricole est cette partie de la population demeurant sur les fermes, sans égard à l'endroit où les fermes sont situées. Une certaine proportion de la population rurale n'a aucun contact direct avec la ferme et, particulièrement dans les régions suburbaines, elle se rapproche plus de la population urbaine que de la population agricole. Au Canada 59.5 p.c. de la population rurale demeurait sur des fermes le 2 juin 1941.

Travailleurs agricoles.—Ce terme s'applique au nombre de personnes travaillant sur la ferme, à l'exclusion du travail ménager, pendant la semaine finissant le 31 mai 1941. Il comprend (a) les membres de la famille de l'exploitant ayant 14 ans et plus, qui travaillaient sur la ferme pendant cette semaine et qui ne touchaient pas de gages réguliers, et (b) toutes les personnes travaillant à gages et engagées à l'année, au mois ou à la journée. Les questions sur la main-d'œuvre agricole mettent également à découvert des renseignements concernant le nombre de semaines de main-d'œuvre louée en 1940 et le montant payé pour cette main-d'œuvre en espèce ou en nature.

Travail en dehors de la ferme et revenu de l'extérieur.—

Le but de ces questions est de se procurer des renseignements concernant (a) le nombre d'exploitants de fermes qui travaillent en dehors de la ferme afin d'augmenter leur revenu, (b) ce que fait l'exploitant dans ce travail, (c) les revenus bruts découlant du travail accompli en dehors de la ferme, et (d) le revenu brut découlant d'autres sources extérieures. Les revenus bruts découlant du travail exécuté en dehors de la ferme comprend les revenus du travail fait par les membres de la famille de l'exploitant ou par la main-d'œuvre louée, avec ou sans l'aide de l'outillage agricole. Le revenu découlant d'autres sources extérieures comprend le revenu brut tiré des pensionnaires, des locataires, des cabines de touristes, des campeurs, de la vente de machines agricoles, et le montant reçu comme assurance-feu et dommages causés par la grêle, etc. Le revenu découlant de placements ou d'autres sources privées n'est pas inclus.

Fermes faisant rapport.—Ce terme, tel qu'employé dans le volume, se rapporte au nombre de fermes qui ont répondu à l'item en question.

Superficie de terre occupée.—Cet item comprend toutes les terres (dans la municipalité) sur lesquelles l'exploitant a exécuté des travaux agricoles quelconques, qu'elles aient été mises en cultures, utilisées pour le pâturage, le bois ou exploitées, et qu'elles aient été possédées, louées, prises à bail ou gérées pour d'autres personnes.

Terre défrichée.—Ce terme employé dans le recensement s'applique à toute la terre qui a été mise en culture et qui, à la date du recensement était propre à être labourée. Il comprend la terre employée pour la culture des récoltes, comme le pâturage amélioré, la terre occupée par les bâtiments, les chemins, les cours, etc., et toute autre terre défrichée sur la ferme qui n'était pas exploitée en 1941.

Superficie en culture.—Cet item comprend toutes les terres défrichées employées pour les grandes cultures, le jardinage, les pépinières et les vergers. Dans les cas où deux récoltes ou plus ont été prises sur la même superficie dans une saison, cette superficie n'a été signalée qu'une fois dans l'enquête. Ces cultures doubles et intercalaires (voir section sur les fermes à fruits et à légumes, page xx) expliqueront pourquoi dans certaines subdivisions (voir tableau 52) la superficie totale en grandes cultures, jardins maraîchers, fruits et récoltes de pépinière dépasse la superficie "en culture".

Crop Failure.—This inquiry refers to the area sown or planted for harvest in 1940, but from which no crop whatever was harvested.

Pure-bred Animals.—All animals that were registered or were eligible for registration as pure-breds are included under this heading.

Farm Value.—This term denotes the value of land and buildings used only for agricultural purposes. It is an estimate, by the farm operator, of the value for which the farm would sell provided there was a willing buyer and seller. The value of buildings is not intended to be the original cost or the replacement value, but a fair estimate of the buildings as they stood at the date of the census.

Farm Indebtedness.—These inquiries elicit information on (a) mortgages and agreements for sale on all buildings and land owned by the farm operator, and (b) debts of the farm operator secured by liens.

The amount of mortgages and agreements for sale include all debts represented by agreements for deed or contracts for title, deeds of trust, judgments and by any other legal instrument that partakes of the nature of a mortgage or agreement for sale. In instances where the owner operated land outside the enumeration area in which he lived, any mortgage or agreement for sale against such property was reported on the resident farm.

Debts secured by liens include liens on crops, live stock or implements, and incurred by the farm operator regardless of whether he was the owner, part owner, tenant or manager of the farm.

Farm Expenses.—Each farm operator was asked to state the expenses incurred, during 1940, in the running of all lands he operated, regardless of whether these lands were located in the enumeration area in which he resided or elsewhere (see section on "Resident" and "Non-resident" farms, page xx). The value of goods received as relief, such as seed, feed, etc., was included, also any cash expenditures incurred in doing work with horses or equipment off the farm.

Feed.—The expenditures for "Feed" include purchases of hay, grain, mill feed or any other products for use as feed for domestic animals or poultry.

Fertilizers.—The item "Fertilizers" includes the amount expended for manures and fertilizers.

Seed.—The expenditures for "Seed" include the amount expended for field, grass and garden seeds.

Purchases and Repairs of Farm Machinery.—This item includes the purchases of farm implements and machinery and expenditures for repairs and repair work on machinery and equipment.

Building Materials.—The amount expended for "Building Materials" includes expenditures for all material used for the construction or repairs to buildings, fences, etc.

Récoltes manquées.—Cette question se rapporte à la superficie enssemencée ou plantée pour la moisson de 1940, mais d'où il n'a été moissonné aucune récolte.

Animaux de race.—Tous les animaux qui sont enregistrés ou qui sont éligibles à l'enregistrement comme étant de race sont inclus sous cet en-tête.

Valeur de la ferme.—Ce terme signifie la valeur de la terre et des bâtiments employés seulement pour les fins agricoles. C'est une estimation faite par l'exploitant de la valeur marchande de la ferme pourvu qu'il y ait un vendeur et un acheteur libres. La valeur des bâtiments n'est pas destinée à représenter le coût original ou la valeur de remplacement, mais une estimation assez exacte des bâtiments tels qu'ils étaient à la date du recensement.

Dettes de la ferme.—Ces questions mettent à jour des renseignements sur (a) les hypothèques et les conventions de vente sur tous les bâtiments et la terre que possède l'exploitant de la ferme, et (b) les dettes de l'exploitant assurées par liens.

Le montant des hypothèques et les conventions de vente comprend toutes les dettes représentées par des conventions de mutation de propriété où contrats, actes fiduciaires, jugements et tous autres instruments légaux qui tiennent de la nature d'une hypothèque ou d'une convention de vente. Dans les cas où le propriétaire exploite de la terre en dehors de la région de dénombrement où il demeure, toute hypothèque ou convention de vente sur cette propriété est déclarée sur la ferme où il réside.

Les dettes protégées par des droits de rétention ou liens comprennent les liens sur les récoltes, les bestiaux ou l'outillage agricole, et contractées par l'exploitant de la ferme sans égard au fait qu'il soit propriétaire, mi-propriétaire, locataire ou gérant de la ferme.

Dépenses de la ferme.—Il a été demandé à chaque exploitant de ferme de déclarer les dépenses faites pendant l'année 1940 dans l'administration de toutes les terres qu'il exploite, sans égard au fait que ces terres soient situées dans la région de dénombrement dans laquelle il réside ou ailleurs (voir la section sur les formes "habitées" et "inhabitées", page xx). La valeur des marchandises reçues comme secours, tels que graines de semence provende, etc., est incluse, de même que les déboursés en espèces pour les travaux avec des chevaux ou de l'outillage en dehors de la ferme.

Provende.—Les dépenses pour la "provende" comprennent les achats de foin, grain, issues de meunerie ou tout autre produit destinés à l'alimentation des animaux domestiques ou des volailles.

Engrais chimiques.—L'item "engrais chimiques" comprend le montant déboursé pour les fumiers et les engrais chimiques.

Graines de semence.—Les dépenses pour "graines de semence" comprennent le montant déboursé pour les graines de grande culture, d'herbe et de jardin.

Achats et réparations de machines agricoles.—Cet item comprend les achats d'outillage et de machines agricoles et les dépenses pour réparations et travail de réparation sur les machines et l'outillage.

Matériaux de construction.—Le montant déboursé pour les "matériaux de construction" comprend les dépenses pour tous les matériaux employés pour la construction ou la réparation des bâtiments, clôtures, etc.

Custom Work.—The item "Custom Work" includes all expenditures for hired custom work done on the farm, such as ploughing, threshing, feed grinding, wood sawing, etc.

Fuel and Oil.—The item of expense "Fuel and Oil" includes the total cost of fuel and oil used for operating tractors, trucks, combines and gasoline engines. It does not include purchases of fuel and oil used in automobiles.

Taxes.—"Taxes" include only real estate taxes levied in 1940 on buildings and land operated by the owner.

Fruit Nursery Stock.—The expenses for "Fruit Nursery Stock" include the amount expended in 1940 for the purchase of nursery stock, such as orchard trees and small fruit plants.

Fruit and Vegetable Supplies.—Included in the expense item, "Fruit and Vegetable Supplies", are the amounts expended for spray materials, sashes, glass for greenhouses and frames, packages, fuel for greenhouses, etc. This item also includes any expenditures for formaldehyde and other chemicals used for treating grains for smut, etc., or as an insecticide.

Farm Labour.—The amount expended for "Farm Labour" includes not only the wages paid in cash, but also the estimated value (by the farm operator) of house rent and/or room and board furnished hired farm labourers. Wages paid hired employees in connection with custom work performed off the farm are included.

Rent.—The expense item, "Rent", includes rent paid in cash, and an estimate (by the farm operator) of the value of rent paid in kind and/or on a share basis.

Other Expenses.—This item includes the amounts expended for telephone, electricity, freight, cartage, horseshoeing, veterinary fees and medicines, bees and apiary equipment, fur-farming equipment and food for fur-bearing animals kept on the farm, hail and fire insurance fees for one year, registration and breeding fees, etc.

Gross Farm Revenue.—This term includes not only the value of products sold or to be sold off the farm in 1940, but also the estimated value of all farm products consumed or used by the farm household during the year. The gross returns from work performed off the farm, the gross income from boarders, lodgers, campers, etc., the amount received from the sale of farm machinery and insurance payments for hail and fire damage, etc., are also included.

Type of Farm.—The information concerning farm revenues was asked in order to supply a means by which all farms could be classified as to type, using as a basis, the main source or sources of revenue in 1940. When the gross revenue was determined, each farm was classified as 'belonging to one of ten main types. Receipts from the sale of farm machinery, from insurance for hail and fire damage, and income received by farm operators who reported two hundred or more days work off the farm, were not used to determine the type of

Travail à forfait.—L'item "travail à forfait" comprend toutes les dépenses faites pour la main-d'œuvre engagée à forfait sur la ferme, telles que le labour, le battage, la mouture des fourrages, le sciage du bois, etc.

Combustible et huile.—L'item de dépenses "combustible et huile" comprend le coût total du combustible et de l'huile employés dans la conduite des tracteurs, camions, combines et moteurs à gazoline. Il ne comprend pas les achats de combustible et d'huile employés dans les automobiles.

Taxes.—Les "taxes" comprennent seulement les taxes foncières prélevées en 1940 sur les bâtiments et la terre exploitée par le propriétaire.

Plants d'arbres fruitiers.—Les dépenses pour les "plants d'arbres fruitiers" comprennent le montant déboursé en 1940 pour l'achat de plants de pépinière, tels que les arbres de verger et les plants d'arbres à petits fruits.

Fournitures pour fruits et légumes.—Dans l'item de dépense "fournitures pour fruits et légumes" sont compris les montants déboursés pour les substances de pulvérisation, les châssis, les vitres de serres et les cadres, emballages, combustible pour serres, etc. Cet item comprend également toutes les dépenses pour l'achat de formaldéhyde et autres ingrédients chimiques employés pour traiter les grains contre le charbon, etc., ou comme insecticide.

Main-d'œuvre agricole.—Le montant déboursé pour la "main-d'œuvre agricole" ne comprend pas seulement les gages payés en espèces, mais aussi la valeur estimative (par l'exploitant de la ferme) du loyer de la maison et/ou de la chambre et de la pension fournies aux travailleurs engagés sur la ferme. Les gages payés aux employés relativement au travail à forfait exécuté en dehors de la ferme sont inclus.

Loyer.—Cet item de dépense comprend le loyer payé en espèces, et une estimation (par l'exploitant de la ferme) de la valeur du loyer payé en nature et/ou sur une base de participation.

Autres dépenses.—Cet item comprend les montants déboursés pour le téléphone, l'électricité, le transport par voie ferrée, le camionnage, le ferrage des chevaux, les honoraires vétérinaires et les médicaments, les abeilles et l'outillage de rucher, l'outillage et les aliments pour l'élevage des animaux à fourrure gardés sur la ferme, les primes annuelles d'assurance contre la grêle et le feu, les frais d'enregistrement et d'accouplement, etc.

Revenu brut de la ferme.—Ce terme comprend non seulement la valeur des produits vendus ou destinés à la vente en dehors de la ferme en 1940 mais aussi la valeur estimative de tous les produits de la ferme consommés ou employés par la famille du cultivateur pendant l'année. Les recettes brutes provenant du travail accompli en dehors de la ferme, le revenu brut provenant des pensionnaires, des locataires, des campeurs, etc., le montant reçu de la vente de machines agricoles et les primes d'assurance contre la grêle et le feu, etc., sont également inclus.

Type de ferme.—Les renseignements relatifs aux revenus de la ferme ont été demandés afin de trouver un moyen par lequel toutes les fermes puissent être classées d'après leur type, en se servant comme base de la ou des principales sources de revenu en 1940. Lorsque le revenu brut est déterminé, chaque ferme est classée comme faisant partie de l'un des dix types principaux. Les recettes provenant de la vente de machines agricoles, de l'assurance contre la grêle et le feu, et le revenu touché par les exploitants de ferme qui ont fait

farm. These amounts were, however, included in the gross farm revenues. A small number of farms, mainly "non-resident" farms used for pasture, and farms just beginning operations in 1941, were not assigned to any particular type, but were included in the total number of farms. The ten types of farms are as follows:

- (1) **"Grain and hay farms"**, are farms where 50 p.c. or more of the gross revenue was derived from the sale of grains, hay and other forage crops, including seeds. Where 40 p.c. of the gross revenue on a "grain and hay farm" was derived exclusively from the sale of wheat, the farm was classified as a "wheat farm".
 - (2) **"Potatoes, roots and other field crops farms"**, are farms where 50 p.c. or more of the gross revenue was derived from the sale of potatoes, roots, root seeds and other field crops, such as tobacco, fibre flax, etc.
 - (3) **"Vegetable, fruit and nursery products farms"**, are farms where 50 p.c. or more of the gross income was derived from the sale of vegetables, small or tree fruits, and greenhouse or nursery products.
 - (4) **"Dairy farms"**, are farms where 50 p.c. or more of the gross revenue was obtained from the sale of dairy products, sold as whole milk, cream or butter.
 - (5) **"Poultry farms"**, are farms where 50 p.c. or more of the gross revenue was derived from the sale of poultry and eggs. Farms which specialized in the sale of day-old chickens are included in this type.
 - (6) **"Live stock farms"**, are farms where the revenue from the sale of horses, cattle, sheep, swine, goats and fur-bearing animals constituted 50 p.c. or more of the gross revenue.
 - (7) **"Forest and apilary products farms"**, are farms where 50 p.c. or more of the gross revenue was obtained from the sale of forest products, maple sugar or syrup, and honey or beeswax.
 - (8) **"Mixed farms"**, are farms where the revenue from two or more of the other main types of products was required to produce 50 p.c. or more of the gross revenue.
 - (9) **"Part-time farms"**, are farms where 50 p.c. or more of the gross revenue was obtained from work performed off the farm (such as lumbering, fishing, road work, custom work), from overnight lodgers, boarders, campers, etc. (see page xxiii).
 - (10) **"Subsistence and combinations of subsistence farms"**:—Farms on which the value of products consumed or used by the farm household amounted to 50 p.c. or more of the gross farm revenue were classed as "Subsistence Farms". "Combinations of Subsistence Farms", are farms where the value of products used or consumed and the revenue from another main type, such as poultry, live stock, etc., were required to form 50 p.c. or more of the gross farm revenue.
- rapport de deux cents jours de travail ou plus en dehors de la ferme, ne sont pas comptées pour déterminer le type de ferme. Cependant, ces montants sont inclus dans le revenu brut de la ferme. Un petit nombre de fermes, principalement des fermes "inhabitées" employées pour le pâturage, et des fermes dont l'exploitation n'était qu'à ses débuts en 1941, ne sont attribuées à aucun type particulier, mais elles sont incluses dans le nombre total de fermes. Les dix types de fermes sont les suivants:
- (1) **Les "fermes à grain et à foin"** sont les fermes où 50 p.c. ou plus du revenu brut provient de la vente des grains, du foin et d'autres récoltes fourragères, y compris les graines de semence. Là où 40 p.c. du revenu brut sur une "ferme à grain et à foin" provient exclusivement de la vente du blé, la ferme est classée comme "ferme à blé".
 - (2) **Les "fermes à pommes de terre, racines et autres récoltes de grande culture"** sont celles où 50 p.c. ou plus du revenu brut provient de la vente des pommes de terre, racines, graines de plantes racines et autres récoltes de grande culture, comme le tabac, le lin à filasse, etc.
 - (3) **Les "fermes à légumes, fruits et produits de serre"** sont celles où 50 p.c. ou plus du revenu brut provient de la vente de légumes, des petits ou des gros fruits, et des produits de serre ou de forçerie.
 - (4) **Les "fermes laitières"** sont celles où 50 p.c. ou plus du revenu brut découle de la vente de produits laitiers, vendus comme lait entier, crème ou beurre.
 - (5) **Les "fermes avicoles"** sont celles où 50 p.c. ou plus du revenu brut provient de la vente des volailles et des œufs. Les fermes qui se spécialisent dans la vente des poussins d'un jour sont incluses dans ce type.
 - (6) **Les "fermes à bestiaux"** sont celles dont le revenu provenant de la vente de chevaux, bêtes à cornes, moutons, porcs, chèvres et animaux à fourrure constitue 50 p.c. ou plus du revenu brut.
 - (7) **Les "fermes à produits forestiers et apicoles"** sont celles où 50 p.c. ou plus du revenu brut provient de la vente de produits forestiers, du sucre ou du sirop d'érable et du miel ou de la cire d'abeille.
 - (8) **Les "fermes mixtes"** sont celles où le revenu provenant de deux ou plus des autres types principaux de produits est nécessaire pour produire 50 p.c. ou plus du revenu brut.
 - (9) **Les "fermes à temps partiel"** sont celles où 50 p.c. ou plus du revenu brut provient du travail accompli en dehors de la ferme (tel que le débit du bois, la pêche, les travaux de voirie, le travail à forfait), des touristes, pensionnaires, campeurs, etc. (voir page xxiii).
 - (10) **Les "fermes vivrières et combinées"**:—Les fermes où la valeur des produits consommés ou employés par la famille du cultivateur s'élève à 50 p.c. ou plus du revenu brut sont classées comme "Fermes vivrières et combinées". Les "Fermes combinées" sont celles où la valeur des produits employés ou consommés et où le revenu provenant d'un autre type principal, tel que volailles, bestiaux, etc., est nécessaire pour constituer 50 p.c. ou plus du revenu brut.

Conversion of "Arpents" to "Acres".

In certain sections of the province of Quebec the land area is reported in "arpents" and not in "acres" as is the case in other parts of the province and in other provinces. When each farm was classified according to the various sizes of holding, the number of "arpents" in the farm had not been reduced to "acres" but, this conversion, which was made later in the process of compilation, reveals a number of instances where the actual area of the farm in acres is less than the minimum area of the size of holding in which the farm was reported (Table 28). For conversion purposes 1,000 arpents equal 845 acres.

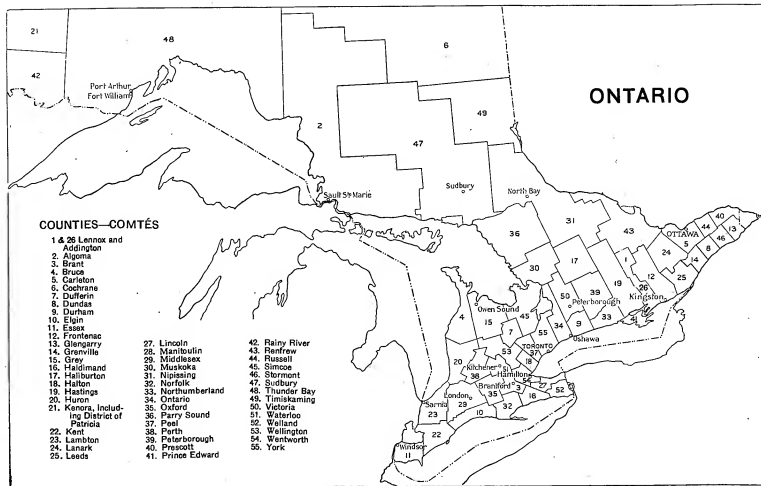

Tabular Index.—A tabular index will be found in Appendix B. This index is intended to show at a glance the tables which are included on each subject, and the other subjects by which each is cross-classified. For example, the reader interested in farm population looks along the heading at the top of the page until he finds "Farm Population" and then searches that column for places marked "X". There are seven of these, indicating seven tables of farm population; one a historical table, one showing the farm population by county or census division, one showing the population on farms in the various census subdivisions, three tables of cross-classifications with size, tenure and type of farm, and a table showing the population on farms according to the "racial origin" of the farm operators. These tables are Tables 1, 28, 51, 78, 80, 81, 82 and according to the index will be found for Ontario, on pages 852, 868, 992 to 1019, 1116, 1118 and 1119 respectively.

Conversion des "arpents" en "acres"

Dans certaines parties de la province de Québec, la superficie de la terre est déclarée en "arpents" et non en "acres" comme dans d'autres parties du Québec et dans d'autres provinces. Lorsque chaque ferme a été classée selon la grandeur de la terre, le nombre d'"arpents" de la ferme n'avait pas été réduit en "acres". Cependant cette conversion, effectuée plus tard au cours de la compilation, révèle que dans certains cas la superficie réelle de la ferme, en acres, est inférieure à la superficie minimum du groupe de grandeur dans lequel la ferme se trouve au tableau 28. Pour fins de conversion, 1,000 arpents égalent 845 acres.

Index des tableaux.—Un index des tableaux se trouve à l'appendice B. Cet index permet de voir d'un coup d'œil les tableaux sur chaque sujet et les autres rubriques contenues sous chacun d'eux en classifications recoupées. Par exemple, le lecteur que la population des fermes intéresse parcourt l'en-tête de la page jusqu'à ce qu'il trouve "Population des fermes", puis il cherche dans la colonne les endroits marqués "X". Il y en a sept, ce qui veut dire qu'il y a sept tableaux sur la population des fermes: un tableau historique; un tableau sur la population des fermes par comté ou division de recensement; un tableau sur la population des fermes dans les diverses subdivisions de recensement; trois tableaux sur la population des fermes recoupée selon la grandeur, la tenure et le type de ferme; un tableau sur la population des fermes selon l'"origine raciale" des exploitants de ferme. Ce sont les tableaux 1, 28, 51, 78, 80, 81, 82 et, d'après l'index, ils se trouvent pour Ontario, aux pages 852, 868, 992 à 1019, 1116, 1118 et 1119 respectivement.

ONTARIO

GENERAL TABLES

TABLEAUX D'ENSEMBLE

TABLE 1. Population, farm holdings, tenure, areas, condition of occupied farm land, live stock and farm values, 1871-1941; expenses and value of farm products, 1900-1940, Ontario

(1) Not available. (2) For comparison with the later censuses, deductions have been made as follows: 69,413 plots under 1 acre in 1891; 20,073 in 1901; and 14,893 in 1911. (3) "Full ownership" means that the operator holds the title to all the land which he operates. It does not necessarily mean that the farm is free of debt. (4) Estimate made in 1931. (5) Includes farm gardens and orchards, see page xx for "Explanation of Terms". (6) Includes area in gardens. (7) Includes area in nursery. (8) Enumerated on "Fruit and Vegetable" schedule. (9) Nursery only. (10) Small fruits only. (11) In 1921, idle land was included with fallow. (12) From 1871 to 1941, figures include live stock and farm products elsewhere than on farms. (13) From 1871 to 1911, the item was "milk cows". (14) Cows and heifers 2 years and over kept for milk production. (15) From automobiles. (16) Does not include farms operated by share tenants and by cash and share tenants. (17) Includes estimated values of rent paid in kind and on a share basis. (18) On buildings and land operated by the owner. (19) Limited to stock raised on farms reporting. (20) Includes value of stock sold alive or slaughtered elsewhere than on farms. (21) Does not include fur-bearing animals and pelts sold (see Table 29).

TABEAU 1. Population, exploitations agricoles, tenure, superficies, état de la terre des fermes occupées, bestiaux et valeurs des fermes, 1871-1941; dépenses et valeur des produits des fermes, 1900-1940, Ontario

(1) Inconnu. (2) Pour comparaison avec les derniers recensements, ont été éliminés: 69,413 lopins de moins de 1 acre en 1891; 20,073 en 1901; et 14,693 en 1911. (3) "Propriété entière" signifie que l'exploitant possède le titre sur toute la terre qu'il exploite, ou qui ne veut pas dire que la ferme est exempte de dette. (4) Estimation faite en 1931. (5) Comprend jardins de ferme et vergers, voir page 23 pour "Exploitation des terres". (6) Comprend la superficie en jardins. (7) Comprend la superficie en pépinière. (8) Énumérés sur le questionnaire des "Fruits et légumes". (9) Pépinière seulement. (10) Petits fruits seulement. (11) En 1921, la terre en repos est comprise avec jachère. (12) De 1871 à 1941 les totaux incluent les bestiaux et les produits de la ferme et ailleurs que sur les fermes. (13) De 1871 à 1911, l'item ne mentionnait que vaches laitières. (14) Vaches et génisses de 2 ans et plus, gardées principalement pour le lait. (15) Comprend automobiles. (16) Ne comprend pas les fermes exploitées par les locataires à parts ou les locataires partie à parts et partie en argent. (17) Comprend la valeur estimative du loyer payé en espèces et sur une base de participation. (18) Sur les bâtiments et la terre exploitée par le propriétaire. (19) Limité aux bestiaux élevés sur les fermes faisant rapport. (20) Comprend la valeur des bestiaux vendus vivants ou abattus ailleurs que sur les fermes. (21) Ne comprend pas les animaux à fourrure et les pelletteries vendus (voir tableaux 20).

TABLE 2. Birthplace of farm operators, 1921-1941, Ontario
TABLEAU 2. Lieu de naissance des exploitants de ferme, 1921-1941, Ontario

| Birthplace—Lieu de naissance | 1921 | 1931 | 1941 |
|-------------------------------------------------------------------------------|-------------------|-------------------|-------------------|
| | No. — nomb. | No. — nomb. | No. — nomb. |
| All occupied farms—Toutes fermes occupées..... | 198,653 | 192,174 | 178,204 |
| Operators reporting—Exploitants faisant rapport..... | 188,065 | 177,587 | 165,670 |
| Born in Canada—Nés au Canada..... | 165,687 | 154,644 | 143,207 |
| Prince Edward Island—Ile du Prince-Edouard..... | 46 | 18 | 31 |
| Nova Scotia—Nouvelle-Ecosse..... | 250 | 133 | 112 |
| New Brunswick—Nouveau-Brunswick..... | 170 | 149 | 152 |
| Quebec..... | 4,966 | 5,011 | 4,031 |
| Ontario..... | 151,230 | 149,054 | 137,996 |
| Manitoba..... | 46 | 171 | 391 |

| Of bearing age—D'âge à rapporter | 999,091 | 784,036 | (2) 587,068 | 437,016 | (2) 257,070 |
| Cherry trees, total—Cerisiers, total | 654,348 | 384,762 | 338,805 | 433,446 | 556,491 |
| Not of bearing age—Trop jeunes pour rapporter | 237,732 | 327,894 | 117,096 | 98,172 | 190,232 |
| Of bearing age—D'âge à rapporter | 446,556 | 506,868 | 421,839 | 335,274 | 269,060 |

(1) The age breakdown of trees, on farms with less than 50 fruit trees, was not obtained in 1941, although the totals for each kind include trees on such farms. For purposes of comparison, apple and crab-apple trees under 10 years of age, peach, pear, plum and cherry trees under 5 years of age, were considered "not of bearing age"—La classification recoupée des arbres par âge, sur les fermes ayant moins de 50 arbres fruitiers, n'a pas été obtenue en 1941, mais les totaux pour chaque espèce comprennent les arbres sur ces fermes. Pour fin de comparaison, les pommiers et les pommetiers de moins de 10 ans; les pêchers, les poiriers, les pruniers et les cerisiers de moins de 5 ans, ont été considérés "trop jeunes pour rapporter".

- (2) Includes crab-apple trees—Comprend pommetiers.
 (3) Includes apricot and prune trees—Comprend abricotiers et pruniers.

(1) Includes automobiles.

(2) Reported on buildings and land operated by the owner.

(3) "Full ownership" means that the operator holds the title to all the land which he operates. It does not necessarily mean that the farm is free of debt.

(4) Land and buildings.

(5) Liens on crops, live stock or implements.

(6) For home use or for sale.

(7) Includes hides sold.

(8) Includes farm gardens and orchards.

(9) Enumerated on "Fruit and Vegetable" schedule.

(1) Includes automobiles.

(2) Reported on buildings and land operated by the owner.

(3) "Full ownership" means that the operator holds the title to all the land which he operates. It does not necessarily mean that the farm is free of debt.

(4) Land and buildings.

(5) Liens on crops, live stock or implements.

(6) For home use or for sale.

(7) Includes hides sold.

(8) Includes farm gardens and orchards.

(9) Enumerated on "Fruit and Vegetable" schedule.

(1) Personnes travaillant sur la ferme à l'exclusion des travaux du ménage durant la semaine finissant le 31 mai 1941.

(2) Personnes 14 ans et plus ne recevant pas de gages.

(3) Comprend les gérants et les membres de la famille de l'exploitant recevant des gages en paiement.

(4) Comprend les données relatives à 1 ferme située dans chacune des municipalités d'Ignace et de Patricia Portion.

(5) Voir renvoi (1).

(1) Persons working on the farm exclusive of house work during the week ending May 31, 1941.

(2) Persons 14 years of age and over not receiving wages.

(3) Includes managers and members of the operator's family receiving wage payments.

(4) Includes data for 1 farm located in each of Carleton and Chapeau Subdivisions.

(5) Includes agricultural data for Township of Needing only. Similar data for Townships of Blake, Crooks and Purdee are included in Other parts.

(1) Personnes travaillant sur la ferme à l'exclusion des travaux du ménage durant la semaine finissant le 31 mai 1941.

(2) Personnes 14 ans et plus ne recevant pas de gages.

(3) Comprend les gérants et les membres de la famille de l'exploitant recevant des gages en paiement.

(4) Comprend les données relatives à 1 ferme située dans chacune des municipalités de Cartier et de Chapleau.

(5) Comprend les données agricoles pour le canton de Neebing seulement. Ces mêmes données pour les cantons de Blake Crooks et Pardon sont comprises dans Autres parties.

(1) Comprend automobiles.

(2) Comprend la valeur des volailles et des abeilles.

(3) Voir renvoi (1).

(4) Les données agricoles de cette subdivision sont comprises dans Autres parties.

(5) Comprend les données relatives à 1 ferme située dans chacune des municipalités de Ignace et de Patricia Portion.

TABLE 53. Farm values, size of farms and non-resident farms, 1941, by subdivision, Ontario—Con.

| No. | Subdivision | Farm values—Valeurs de la ferme | | | | |

(1) 1 year and over.

(2) Includes alfalfa, clovers and all cultivated grasses.

(3) Includes data for 1 farm located in each of Cartier and Chapleau Subdivisions.

(4) Includes agricultural data for Township of Neebing only. Similar data for Townships of Blake, Crooks and Pardee are included in Other parts.

(1) 1 an et plus.

(2) Comprend luzerne, trèfles et toutes herbes cultivées.

(3) Comprend les données relatives à 1 ferme située dans chacune des municipalités de Cartier et de Chapleau.

(4) Comprend les données agricoles pour le canton de Neenbing seulement. Ces mêmes données pour les cantons de Blake, Crooks et Parden sont comprises dans Autres parties.

TABLE 54. Live stock on farms and area of field crops, 1941, by subdivision, Ontario—Con.

| No. | Subdivision | Live stock—Bétail | | | | | | | |

| 58 | Animal products..... | " | (1) | (1) | 3,415,885 | 8,448,913 |

(1) Not available. (2) For comparison with the later censuses, deductions have been made as follows: 563 plots under 1 acre in 1891; 243 in 1901; 1,278 in 1911. In 1921 farms on Indian Reserve in the Prairie Provinces are not included. (3) "Full ownership" means that the operator holds the title to all the land which he operates. It does not necessarily mean that the farm is free of debt. (4) Estimate made in 1931. (5) Area includes only improved acreage of Indian Reserves. (6) Includes farm gardens and orchards, see page 12 for "Explanation of Terms". (7) Includes area in gardens. (8) Includes area in nursery. (9) Enumerated on "Fruit and Vegetable" schedule. (10) Nursery only. (11) Small farms only. (12) In 1921, idle land was included with fallow. (13) In 1921, 1931 and 1941, figures include live stock and farm products elsewhere than on farms. (14) From 1881 to 1911, the item was "milk cows". (15) Corrections made since 1921 Census. (16) Cows and heifers 2 years and over kept for milk production. (17) Includes automobiles. (18) Does not include farms operated by share tenants and by cash and share tenants. (19) Includes estimated value of rent paid in kind and on a share basis. (20) On buildings and land operated by the owner. (21) Limited to stock raised on farms reporting. (22) Includes value of stock sold alive or slaughtered elsewhere than on farms. (23) Does not include fur-bearing animals and pelts sold (see Table 22).

(1) Inconnu. (2) Pour comparaison avec les derniers recensements, ont été éliminés: 563 lopins de moins de 1 acre en 1891; 243 en 1901; 1,278 en 1911. En 1921, les fermes sur les réserves indiennes dans les provinces des prairies ne sont pas comprises. (3) "Propriété entière" signifie que l'exploitant possède le titre sur toute la terre qu'il exploite, ce qui ne veut pas dire que la ferme est exempte de dette. (4) Estimation faite en 1931. (5) Comprend seulement la superficie défrichée des réserves indiennes. (6) Comprend jardins de ferme et vergers, voir page xx pour "Explication des termes". (7) Comprend la superficie en jardins. (8) Comprend la superficie en pépinière. (9) Énumérés sur le questionnaire des "Fruits et légumes". (10) Pépinière seulement. (11) Petits fruits seulement. (12) En 1921, la terre en repos est compris avec jachère. (13) En 1921, 1931 et 1941, les totaux incluent les bestiaux et les produits de la ferme et ailleurs que sur les fermes. (14) De 1891 à 1911, l'item ne mentionnait que vaches laitières. (15) Corrections faites depuis le recensement de 1921. (16) Vaches et génisses de 2 ans et plus, gardées principalement pour le lait. (17) Ne comprend pas les fermes exploitées par les locataires à parts, ou les locataires partie à parts et partie en argent. (18) Comprend la valeur estimative du loyer payé en espèces et sur une base de participation. (19) Sur les bâtiments et la terre exploitée par le propriétaire. (20) Limité aux bestiaux élevés sur les fermes faisant rapport. (21) Comprend la valeur des bestiaux vendus vivants ou abattus ailleurs que sur les fermes. (22) Ne comprend pas les animaux à fourrure et les pelletteries vendus (voir tableau 29).

| Tobacco—Tabac | 655 | 345 | 2,071 | 84 |
| Flax for fibre—Lin fibreux | (⁸) | 430 | 19,119 | 3,200 |
| Other field crops—Autres grandes cultures | 40 | - | 5,923 | 44 |

(¹) Includes soybeans—Comprend fèves de soya.

(²) Mixed or other grains—Grains mélangés ou autres.

(³) Includes alfalfa, clovers and all cultivated grasses—Comprend luzerne, trèfles et toutes herbes cultivées.

(⁴) Not available—Inconnu.

(⁵) Includes millet and Hungarian grass—Comprend millet et maïs de Hongrie.

(⁶) Millet and Hungarian grass are included with hay, cultivated—Millet et maïs de Hongrie sont compris dans foin cultivé.

(⁷) Includes root seeds—Comprend graines de racines.

TABLE 13. Fruit trees on farms, 1901-1941, Manitoba
TABLEAU 13. Arbres fruitiers sur les fermes, 1901-1941, Manitoba

| Fruit trees—Arbres fruitiers | 1901 | 1911 | 1921 | 1931 | 1941(¹) |
|--------------------------------------------------------------------|-----------|-----------|------------------------|-----------|-------------------------|
| | No.—nomb. | No.—nomb. | No.—nomb. | No.—nomb. | No.—nomb. |
| Apple trees, total(²)—Pommiers, total(²) | 8,332 | 22,093 | 4,537 | 18,338 | 46,902 |
| Not of bearing age—Trop jeunes pour rapporter | 7,241 | 17,801 | 4,442 | 10,867 | 20,053 |
| Of bearing age—D'âge à rapporter | 1,091 | 4,292 | 2,095 | 7,471 | 2,008 |
| Peach trees, total—Pêchers, total | - | 78 | 11 | 6 | 356 |
| Not of bearing age—Trop jeunes pour rapporter | - | 47 | 6 | 4 | 14 |
| Of bearing age—D'âge à rapporter | - | 31 | 5 | - | 30 |
| Pear trees, total—Poiriers, total | - | 73 | 11 | 139 | 4,722 |
| Not of bearing age—Trop jeunes pour rapporter | - | 59 | 11 | 86 | 2,230 |
| Of bearing age—D'âge à rapporter | - | 14 | - | 53 | 2,262 |
| Plum trees, total—Pruniers, total | 41,663 | 13,984 | (³) 2,481 | 11,795 | (⁴) 40,609 |
| Not of bearing age—Trop jeunes pour rapporter | 17,569 | 8,801 | (³) 765 | 2,667 | (⁴) 10,375 |
| Of bearing age—D'âge à rapporter | 24,094 | 5,183 | (³) 1,716 | 9,128 | (⁴) 9,967 |
| Cherry trees, total—Cérusiers, total | 13,642 | 12,147 | 682 | 3,407 | 14,542 |
| Not of bearing age—Trop jeunes pour rapporter | 5,540 | 2,371 | 345 | 1,433 | 2,881 |
| Of bearing age—D'âge à rapporter | 8,102 | 9,776 | 337 | 1,974 | 465 |

(¹) The age breakdown of trees on farms with less than 50 fruit trees, was not obtained in 1941, although the totals for each kind include trees on such farms. For purposes of comparison apple and crab-apple trees under 10 years of age; peach, pear, plum and cherry trees under 5 years of age, were considered "not of bearing age".—La classification recueillie des arbres par âge sur les fermes ayant moins de 50 arbres fruitiers, n'a pas été obtenue en 1941, mais les totaux pour chaque espèce comprennent les arbres sur ces fermes. Pour fin de comparaison les pommiers et les pommiers de moins de 10 ans, les pêchers, les poiriers, les pruniers et les cerisiers de moins de 5 ans, ont été considérés "trop jeunes pour rapporter".

(²) Includes crab-apple trees—Comprend pommiers.

(³) Includes apricot and prune trees—Comprend abricotiers et pruniers.

(1) Includes automobiles.

(2) Reported on buildings and land operated by the owner.

(3) "Full ownership" means that the operator holds the title to all the land which he operates. It does not necessarily mean that the farm is free of debt.

(4) Land and buildings.

(5) Liens on crops, live stock or implements.

(6) For home use or for sale.

(7) Includes hides sold.

(8) Includes farm gardens and orchards.

(9) Enumerated on "Fruit and Vegetable" schedule.

(1) Comprend automobiles.

(2) Sur les bâtiments et la terre exploitée par le propriétaire.

(3) "Propriété entière" signifie que l'exploitant possède le titre sur toute la terre qu'il exploite, ce qui ne veut pas dire que la ferme est exempte de dette.

(4) Terre et bâtiments.

(5) Liens sur récoltes, bétail ou instruments.

(6) Pour consommation ménagère ou pour vente.

(7) Comprend les peaux vendues.

(8) Comprend jardins de ferme et vergers.

(9) Énumérés sur le questionnaire des "Fruits et légumes".
